

# HEALTH AND SAFETY WHILE OPERATING A PIPE RAIL TROLLEY

## Risks

Tip over of pipe rail trolleys

Falls from pipe rail trolleys

Entrapment

Driving over foot

## PPE for safety

Safety shoes

## Measures

### 1. Before starting work

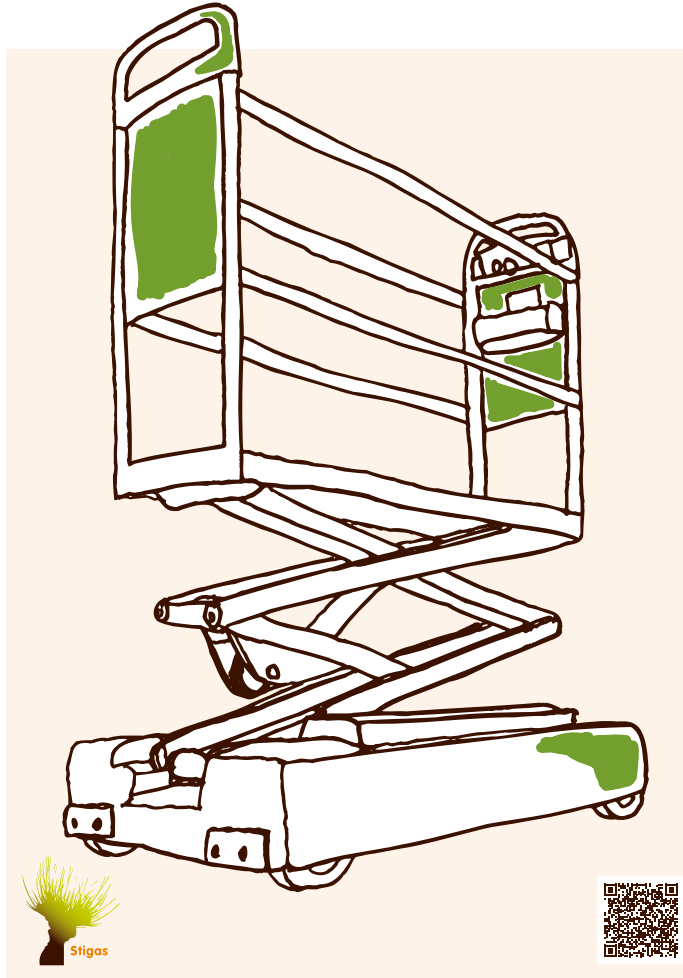

You are 18 years or older

Acquire training on safe use of the pipe rail trolley

Always use an undamaged trolley to work

**Call in the event of emergency or breakdown**

### 1. Before starting work

Check for subgrade subsidence

Check that tubes are stable and undamaged

Check safety equipment (safety railing and tilt alarm)

### 2. During work

Keep platforms clean to prevent slipping

Always have safety railings in place while working

Tilt alarm or malfunction? Stop work

Never rush work

### 3. After completing work

- Drive pipe rail away in lowest position
- Set main switch to off and steer trolley into neutral position
- Always report malfunctions, unsafe situations or accidents to supervisor
